

Materials & Warranty

- All framing is made from aluminium which is precut, bent and drilled.
- The foundation is supplied as H.4 tanalised dressed timber.
- Covers are 'machine welded' one piece sheets using the highest quality 200 micron greenhouse film which carries a 5 year warranty against ultra-violet breakdown. The expected life of plastic covers is in excess of 10 years.
- All outer aluminium surfaces are covered with protective tape which prevents chaffing or heat damage to the cover.
- Sheet tensioning methods ensure covers are always drum tight - the secret to long life.

Sizes

Our standard size is 2.4 metres (8'0") wide by 1.9 metres (6'4") high.

Length	Width	Doors	Roof Vents
2m (6'0")	2.4m	1	1
3m (10'0")	2.4m	1	1
4m (13'0")	2.4m	1	1
5m (16'6")	2.4m	1	2
6m (20'0")	2.4m	1	2
8m (26'0")	2.4m	1	2

Low Maintenance

Premier Tunnel Houses require little maintenance to ensure long life.

The tensioning method ensures covers are drum tight and punctures are easily repaired with special tape available from **Premier Tunnel Houses**.

Covers should last around 10 years. Hosed down regularly to remove dust and grime.

INSIST ON PREMIER TUNNEL HOUSES

Premier Tunnel Houses for fast luxurious growth all year round

Gardeners Delight...

Premier Tunnel Houses are made in New Zealand, for new and dedicated gardeners.

They are made of the highest quality materials to enhance durability, strength and growing power.

Based in Feilding, **Premier Tunnel Houses** are distributed through approved agents.

Because they come in a range of sizes, these tunnel houses suit almost any gardener, and with their proven heat retention are also popular with commercial and specialist growers.

For over 25 years **Premier Tunnel Houses** have proven their qualities in a variety of gardening and commercial growing environments.

Unique...

Premier Tunnel Houses are made of an aluminium frame covered with a strong plastic film tensioned for strength. What makes them special is their unique ability to grow produce faster and for longer than outdoor gardening methods. Their proven heat retention enables enjoyment of home-grown fruit and vegetables all year round.

They are also suitable for orchid growing and propagation of plants and seedlings.
